dang...

this is good. When this game was announced I looked forward to it every day! and was excited as the days passed by till the release day before it was released on steam.

As I fell in love with the story and it tore my heart to pieces with the events taking place in the story line. The only ending I will say that I prefer is with Tian Xi;; the others I cried for a few days. There is a bonus ending which got my hopes up only to shatter it and I cried more.

I love the soundtracks and the ending theme as well 'color my world', I played it roughly for six hours straight.

I do hope that Zeiva creates another wonderful visual novel such as this :). Excellent arcade type puzzle game. Cheap. Well worth the money.. Is a rip-off from "Hidden Folks". The style is very similar, but not that well executed. The sounds are probably ripped off too.. This game looks like it is 10 years old and has bugs all over the place (e.g. what do you do when you get stuck on the guard rail which happens all the time!) Refunded.. For collection. May be Arc System Works will think of port for PC whole series.. Has improved my boners by 2.3%

A lot of the effects have not been working for me. After a YEAR there has been no reply or help for this problem! How can I enjoy a broken simulator? Spending minutes to place effects and not seeing them is utterly frustrating. I can not recommend this until it gets repaired. So far this sim has just been a waste of my €10,-. It's on sale for \$0.29 right now, but you're better off just buying a gumball instead. It's four cents cheaper and you can blow bubbles.. This game is good for achievement hunters, but might kill some of your brain cells.. A very fun little slasher game. Akane is an absolute joy to play with very slick controls and satisfying gun/sword-play. There's also a progression system in the game in the form of challenges that unlock various gear (most of them are side-grades). Some of the challenges are a bit poorly paced, quite a few difficult challenges are followed by easier ones. It took me ~16 hours to finish everything and I had a blast getting all the achievements which is really great value for ~3€.

Overall it's a very fun experience with a satisfying learning curve. 9/10 would play again.. This DLC is currently broken, new players are unable to start a new game.. At first glance it looks and feels like something you can relax to. No button smashing, no tricky controls, no absurd combos, you get the point. You learn early, tho, this is not the case. About the fourth strand in, i was getting kind of aggravated. It wasn't a difficult strand either, they made look way more difficult than it was.

A casual game that is worth a look. Graphics are solid, sound is solid. The puzzles are good for a challenge here and there.

8/10. It's a kids game. A rather good kids game for that matter, puzzles and adventure they'd enjoy well. Tis the only reason I recommend it and please note, I only recommend it for kids. I was bored out of my mind.
